4WD & Off-Road Vehicle Management Strategy

Have your say on beach driving from Rockingham to Busselton

Keeping our beaches open and our coast healthy.

The Peron Naturaliste Partnership (PNP) and its nine member local governments are preparing a regional strategy for four-wheel drive and off-road vehicle use on our coast. It is about balance, not a ban: keeping recreational beach driving while protecting the dunes, wildlife, safety and cultural values of the coast.

What is happening?

- Now: the project team is visiting beaches with local government staff and Rangers and reviewing current rules and plans.
- Early 2027: community survey and drop-in sessions along the coast.
- Mid to late 2027: draft strategy released for public comment.

How can I be involved?

- Visit the PNP website project page here or email the project team for updates on the project and to hear when the survey opens.
- Complete the community survey in early 2027 (online or on paper).
- Come to a drop-in session near you.
- Groups can ask to nominate a representative to the stakeholder reference group.

Find out more:

To find out more, visit the PNP website project page here. The project is partly funded by the Western Australian Government through the CoastWA program, with co-funding from the PNP.
